Disclaimer

The EBRD is bound by strict confidentiality. Any information or documents shared with us is privileged and confidential. Any review, use, disclosure, or distribution of this information is strictly limited to our NDA-bound technical evaluators.

1. Project Details

- Project Title:
- Researcher:
- University Affiliation:
- Company Name:

2. Research Abstract (300-600words)

- Present the research questions or hypotheses.
- Please define project objectives that the organisation aims to achieve, providing strategic direction and purpose.
- Highlight the significance and contributions of the study
- Present the research conclusions and summarize main results

3. Literature Review (min. 200 words)

- Please include sample list of titles of relevant literature and theoretical frameworks referred to for the research.

4. Methodology (min. 250 words)

- Detail the research design, sampling methods, data collection procedures, and analytical techniques.
- Provide justifications for the chosen methods

5. Results Interpretation (min. 300 words)

- Present short summary of findings with both quantitative and qualitative results.
- Interpret the results of your activities and their impact (on target groups, change, innovation etc.)
- Use visuals such as tables, charts, and graphs to enhance understanding.

6. Next Steps and Limitations (min. 250 words)

- Identify the key needs to take your innovation to market (e.g. further research, prototyping/testing, access to markets and finance, IP support, regulatory support and standardisation framework).
- Acknowledge limitations or constraints in the study if any.
- Please describe potential risks the project faces and proposed mitigation measures for the further development of the project.

7. Appendix (optional)

- Include any additional material such as survey instruments, raw data, photo evidence and any additional analysis as deemed necessary.
